

MAVERICK THE FUTURE OF MIXED-LOAD HANDLING STARTS HERE

FANUC Collaborative CRX-30iA

- Single phase power, 120 or 240 VAC
- 30KG capacity
- Up to 12 picks/MIN
- Vacuum EOAT
- Portable
- Intuitive interface

AI-Enabled Vision

- MujinOS AI box locating
- 2D and 3D Vision guidance
- Completely mixed load pallets
- Handles box sizes ranging from 3"x6"x7" to 12"x16"x16"

Cell Features

- 60" pallet heights/w option to increase
- 2 Depal pallet locations
- Cell footprint 6.5'X10' w/ pallets
- Easily fits into any line

Engineered to overcome the toughest warehouse challenges

Manufacturers and warehouse operators are facing labor shortages, ergonomic challenges, and increasing pressure on inbound logistics operations. At the same time, mixed-load palletizing, depalletizing, and warehouse flow inefficiencies are making it harder to maintain productivity and scale efficiently.

Flexible automation for today's warehouse demands

We designed Maverick to be scalable and flexible. But we know one size never fits all. Our engineering team has expertise with the full suite of FANUC robots handling individual small boxes to full pallet layers. AMT is redefining warehouse and 3PL automation with our standard and custom systems.
