PROTECT YOUR INVESTMENT: PREVENTIVE MAINTENANCE

With peak production season underway, it's the perfect time to ensure your systems are optimized for maximum uptime.

Applied Manufacturing Technologies (AMT) offers comprehensive Preventive Maintenance services custom tailored to meet your systems needs. Our services are designed to minimize downtime, prevent costly repairs, and keep your operations running smoothly.

COMPREHENSIVE SERVICES

Our Preventive Maintenance package includes a thorough assessment and servicing of your equipment.

Key services include:

- **Full System Assessments:** We evaluate each component of your system to ensure you are achieving optimal performance.
- **Wire Inspections:** We check for fraying, wear, or other issues that could lead to failure.
- **Robot Greasing:** Ensuring all robotic components are properly lubricated to avoid unnecessary wear.
- **System Cleanups:** Removal of dust, debris, and buildup that could interfere with performance.
- **Up-to-Date Backups:** We create or update system backups to prevent data loss and facilitate quick recovery if needed.
- **Spare Parts Identification:** Our team proactively identifies any wearing parts and arranges for their replacement.

WHY CHOOSE TO CONDUCT PREVENTIVE MAINTENANCE?

Preventive Maintenance provides a proactive approach to avoid costly unplanned downtime and improve operational efficiency. Studies show that unplanned downtime can reduce production efficiency by up to 20% and that each maintenance dollar invested can save five times in repair costs. With AMT's comprehensive services, you're investing in reliability, safety, and long-term savings.

Additional benefits include:

- **Reduced Downtime:** A proactive approach can reduce unplanned downtime by up to 30%.
- **Cost Savings:** Preventive maintenance can lower maintenance costs by 12-18%.
- **Extended Equipment Life:** Regular servicing extends the lifespan of your automation systems.

FULL SUPPORT FROM AMT

At AMT, we understand the unique demands of the automation industry, especially during peak production seasons. Our fully staffed engineering team is available for any future project work, and our technical support team is ready to provide remote assistance whenever needed. Partnering with AMT means having experts on your side, dedicated to keeping your systems running at their best.
